Paul Hsieh's web licenses

Unless otherwise accompanied by another included license, the text and explicitly rendered exposition of all content under this website is covered by the **Paul Hsieh exposition license.**

For the specific coverage of raw source code (only) obtained from this website, you have the option of using **the old-style BSD license** to use the code instead of other the licenses. This option has been provided for people who can't figure out what I talking about with my derivative license, or who are using a old-style BSD compatible license.

Unless otherwise accompanied by another included license, derivative work by taking portions or ideas from the above mentioned exposition are covered by the **Paul Hsieh derivative license.**

Paul Hsieh exposition license

The content of all text, figures, tables and displayed layout is copyrighted by its author and owner Paul Hsieh unless specifically denoted otherwise. Redistribution is limited to the following conditions:

- The redistributor must fully attribute the content's authorship and make a good faith effort to cite the original location of the original content.

- The content may not be modified via excerpt or otherwise with the exception of additional citations such

Paul Hsieh OLD BSD license

Copyright (c) 2010, Paul Hsieh
All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

- Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

- Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

- Neither my name, Paul Hsieh, nor the names of any other contributors to the code use may not be used to endorse or promote products derived from this software without specific prior written permission.

Paul Hsieh derivative license

The derivative content includes raw computer source code, ideas, opinions, and excerpts whose original source is covered under another license and transformations of such derivatives. Note that mere excerpts by themselves (with the exception of raw source code) are *not* considered derivative works under this license. Use and redistribution is limited to the following conditions:

- One may not create a derivative work which, in any way, violates the **Paul Hsieh exposition license** described above on the original content.

Examples: Unless covered by another accompanying license, source code shown on my website can be used freely under the **derivative license**, (and may be distributed under a public domain license, whether compiled into another program or not, for example) however the font, comments, colors or any layout details associated to that source code in its exposition are covered by the **exposition license**.

The entire English text describing the code is also covered under the **exposition license** and thus cannot be copied at all outside the limits of fair use.

Images and graphics shown on this website are entirely covered by the **exposition license**.

If a proprietary vendor wishes to create a closed source object code based product using source covered by the **derivative license** they may do so. However if this vendor then wished to distribute the original source code, they may not apply any licensing terms which contradict the original **derivative license** covering the derivative code.

If your code is compatible with the old style BSD license and you wish to avoid the burden of explicitely protecting code you obtained from here from misrepresentation then you can simply cover it with the **old-style BSD license**.
